### PROFESSIONAL EXPERIENCE

#### Randstad India

Feb 2024 - Present

Performed the role of Senior Technical Consultant with a Banking Client.

- Designed functional specifications aligned with client requirements to ensure seamless project delivery.
- Prepared comprehensive technical design documentation to support development and implementation processes.
- Developed, tested, and deployed software changes within specified timelines, ensuring high-quality standards.
- Managed project updates and progress tracking using ticketing tools for efficient workflow and communication.

#### Oracle Cerner Health Care Solutions Pvt Ltd

May 2022 – Dec 2023

Performed the role of Software Engineer I within the Rev Cycle Development Team, specializing in the enhancement and maintenance of the INVISION application.

- Requirement gathering, analysis, coding, testing and project implementation.
- Took ownership of CICS screen modifications in response to new requirements arising from CMS rule changes.
- Took charge of integrating third-party insurance grouping and reimbursement software with our billing software to ensure accurate calculation of claim reimbursement for our client's services.
- Led the integration process, which entailed modifying our application code to accommodate new fields or rules from CMS. Conducted rigorous testing using production data to validate accurate reimbursement calculations and identify any errors.
- Developed comprehensive implementation plans to ensure seamless client integration and successfully executed implementation.
- Performed the crucial task of documenting test cases and generating audit reports for clients, ensuring timely delivery on a weekly, monthly, and quarterly basis.
- Assumed the responsibility of monitoring clients' day-end update jobs on a weekly rotational basis, ensuring their smooth execution. Proactively addressed and

resolved any encountered abends to minimize disruptions and maintain optimal system performance.

- Participate in code reviews and identify moderate issues or deviations from best practices.

## **Accenture PLC**

**Dec 2019 – May 2022**

Functioned as an Associate Software Engineer for an Oil and Gas Trading company, providing dedicated support and enhancements to their trading application.

- Participate in code reviews and identify moderate issues or deviations from best practices
- Collaborate on component-level technical designs
- Own and assist others in debugging and documenting root cause analysis and resolution
- Identify process improvements at the team level to support operations and development ecosystem
- Provide software release support
- Mentor and train new associates within team and training programs
- Delegate the work appropriately, provide clear expectations and follow up to ensure progress and overcome roadblocks. Identify associates and team priorities based on business direction and adjust when needed.
